because this figure better	characterizes the invention.	

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

NEW ABSTRACT

A limited access space inspection system (10) comprising: a sensing device (12) for carrying out sensing over a region in the limited access space, a mounting (16) for mounting the sensing device (12) to scan about the limited access space and a scanning control unit, associated with the sensing device (12) for controlling the sensing device (12) to scan about the limited access space. The device (10) is particularly useful for improving by automation, security checks, customs checks and safety checks involving such awkward to access spaces. The sensing device (12) may be an imaging device (12), or a sensor for detecting traces of chemical substances.
